

Adrian Tobar Hanze

Salesforce Technical Consultant | Platform Developer II | Platform Sharing and Visibility Architect

Guayas, Ecuador +593 98 468 1976 adriantobar97@gmail.com linkedin.com/in/adrian-tobar-hanze

SUMMARY

Salesforce professional with 3+ years of hands-on platform experience across Sales Cloud and Service Cloud, delivering Flow automation, Apex development, Lightning Web Components, and REST API integrations for distributed teams. Admin-to-developer hybrid background, currently advancing toward Salesforce Certified Application Architect (3 of 4 requirements complete; Platform Data Architect targeted next). Experienced in sharing and security architecture, executive reporting, and translating business requirements into scalable, maintainable Salesforce solutions.

TECHNICAL SKILLS

Salesforce Platforms: Sales Cloud, Service Cloud, CPQ

Automation: Flow Builder, Process Builder

Development: Apex, Lightning Web Components (LWC), SOQL

Security & Sharing: Profiles, Permission Sets, Sharing Rules, Role Hierarchy, Sharing & Visibility Architecture

Integrations: REST APIs, Named Credentials

Deployment: Change Sets, Salesforce DX

Collaboration: Jira, Git

PROFESSIONAL EXPERIENCE

Salesforce Administrator & Developer — Trinity Relationship Management (*Hourly*) January 2025 – Present

Provide Salesforce administration and operational support for enterprise CRM environments used by distributed teams.

- Designed executive dashboards to track pipeline performance, sales metrics, and operational KPIs
- Implemented Flow-based automations that reduced manual workload across sales operations
- Performed large-scale CRM data cleanup, improving reporting accuracy and data reliability
- Supported user lifecycle management including onboarding, offboarding, and permission configuration
- Maintained reports and dashboards aligned with leadership decision-making needs
- Troubleshoot system issues related to permissions, automation behavior, and UI inconsistencies
- Collaborated with stakeholders to translate business needs into scalable Salesforce configurations

Salesforce Administrator — ApexHyve (*Freelance*)

March 2023 – January 2026

Delivered enterprise-level Salesforce solutions combining declarative automation and custom development.

- Automated complex business workflows using Flow Builder, Apex triggers, and validation logic
- Developed Lightning Web Components (LWC) improving user experience and process efficiency
- Integrated Salesforce with external systems using REST APIs, enabling real-time data synchronization
- Designed secure role hierarchy and permission structures aligned with compliance standards
- Built advanced reports and dashboards supporting sales and service performance tracking
- Implemented scalable automation solutions that reduced manual operational effort

- Supported cross-functional teams in translating business requirements into technical implementations
- Contributed to CRM architecture improvements supporting long-term platform scalability
